| project Name | Educational organization using ServiceNow |

**Project:** Educational Management System Using ServiceNow

## 1. Objectives:

- To verify that all functional requirements are met (calculations, auto-population).
- To ensure the application is responsive and meets non-functional performance requirements.
- To identify and log any bugs or defects before deployment.

## 2. Test Cases:

| Test Case ID | Feature            | Test Steps                                                                                                     | Expected Result                                                                                         | Actual Result | Pass/Fail |
|--------------|--------------------|----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------|-----------|
| TC-01        | Form Load          | 1. Navigate to "Admission" > "New".<br><br>2. Time how long the form takes to load.                            | Form should be interactive in < 3 seconds.                                                              |               |           |
| TC-02        | Pincode Script     | 1. On the Admission form, go to the "Pincode" field.<br><br>2. Enter "509358".<br><br>3. Tab out of the field. | "Mandal," "City," and "District" fields instantly populate with "kadthal," "kadthal," and "RangaReddy." |               |           |
| TC-03        | Number Maintenance | 1. Fill out and save a new "Admission" record.<br><br>2. Open the new record.                                  | The field is populated with a unique ID starting with "SAL" (e.g., "SAL0000001").                       |               |           |

| Test Case ID | Feature           | Test Steps                                                                                                         | Expected Result                                                                                    | Actual Result | Pass/Fail |
|--------------|-------------------|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|---------------|-----------|
|              |                   | 3. Check the "Admin Number" field.                                                                                 |                                                                                                    |               |           |
| TC-04        | onLoad Script     | 1. Navigate to "Student Progress" > "New".<br><br>2. Observe the form.                                             | The Total, Percentage, and Result fields are all grayed out (read-only).                           |               |           |
| TC-05        | Calculation Chain | 1. On the "Student Progress" form, enter "70" into all 6 subject fields.<br><br>2. Observe the calculation fields. | - Total updates to "420".<br>- Percentage updates to "70%".<br><br>- Result updates to "Pass".     |               |           |
| TC-06        | Result: Fail      | 1. On the "Student Progress" form, change all marks to "50".<br><br>2. Observe the calculation fields.             | - Total updates to "300".<br><br>- Percentage updates to "50%".<br><br>- Result updates to "Fail". |               |           |
| TC-07        | Auto-Populate     | 1. On the "Student Progress" form, select an existing student in the                                               | The student's "Student Name," "Father Name," etc., auto-populate on the form.                      |               |           |

| Test Case ID | Feature        | Test Steps                                                                                                                                         | Expected Result                                                                                 | Actual Result | Pass/Fail |
|--------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|---------------|-----------|
|              |                | "Admission Number" field.                                                                                                                          |                                                                                                 |               |           |
| TC-08        | Error Handling | <p>1. On the "Student Progress" form, manually force the Percentage to "110" (using a separate script).</p> <p>2. Trigger the "Result" script.</p> | An error message "Percentage should be between 0 and 100" appears. The Result field is cleared. |               |           |
