

Ideation Phase

Empathy Map Canvas

Date	November 2, 2025
Team ID	NM2025TMID00744
project Name	Educational organization using ServiceNow

User Persona: School Administrator

- **SAYS:**

- "Where is the admission file for this student?"
- "I have to re-enter this same address in three different spreadsheets."
- "Did I calculate this student's total marks correctly?"
- "I need to know how many students are in the 'Joined' status by tomorrow."

- **THINKS:**

- "I'm so worried I'll make a typo on a grade report."
- "This manual data entry is taking up my entire day."
- "There must be a faster, more professional way to do this."
- "I wish I could just look up a student and see everything about them in one place."

- **FEELS:**

- **Frustrated** with repetitive tasks.
- **Overwhelmed** during admission and exam seasons.
- **Stressed** about the accuracy of the data.
- **Responsible** for maintaining correct student records.

- **DOES:**

- Manually copies data from paper forms into Excel.
- Uses a calculator to total student marks.
- Spends hours cross-checking different lists and files.
- Answers phone calls from parents asking for status updates.

- **PAINS (Problems):**

- High risk of human error in calculations and data entry.
- Incredibly time-consuming.
- No central view; data is scattered.
- Difficult to generate reports quickly.

- **GAINS (Goals):**

- A single, reliable system for all student data.
- Automated calculations (Total, Percentage) to ensure accuracy.
- A clear, visual way to track admission status.

- Faster data entry (e.g., pincode auto-fills address).
- More time to focus on valuable work.
