

Project Design Phase

Solution Architecture

Date	November 2, 2025
Team ID	NM2025TMID00744
project Name	Educational organization using ServiceNow

Architecture Overview:

This application is built as a custom application within the ServiceNow platform. It follows a simple, data-centric architecture where the user interface (forms) interacts directly with the custom tables, and client-side logic provides a dynamic user experience.

Component Diagram:

- **User (Admin/Teacher):** Interacts with the system via a web browser.
- **ServiceNow UI (Forms & Lists):**
 - **Admission Form:** u_admission
 - **Student Progress Form:** u_student_progress
- **Business Logic (Client Scripts):**
 - onLoad (Disable Fields)
 - onChange (Auto-populate, Pincode, Total, Percentage, Result)
- **Data Model (Custom Tables):**
 - **u_salesforce (Base Table):**
 - Contains common fields (Admin Number, Student Name, etc.).
 - Extensible: true
 - Number Maintenance: SAL...
 - **u_admission (Child Table):**
 - *Extends* u_salesforce.
 - Contains admission-specific fields (Admin Status, Pincode, etc.).

- Has Process Flow attached.
- **u_student_progress (Related Table):**
 - Contains a **Reference Field** to u_salesforce.
 - Contains subject and calculation fields (Maths, English, Total, etc.).

Table: u_salesforce

A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)

This is a 1-to-1 relationship because Admission extends Salesforce.

(u_salesforce) 1 ---- N (u_student_progress)

This is a 1-to-Many relationship, as one student (one Salesforce record) can have many progress reports.
